

Maritime decarbonisation forum: shaping a sustainable future

Half day seminar and cocktail reception

**Thursday 21 September 2023 | Registration starts at 2:00pm |
Hong Kong Maritime Museum**

We are delighted to invite you to attend our decarbonisation forum on Thursday 21 September 2023 at the Hong Kong Maritime Museum.

Decarbonisation is a cornerstone of Stephenson Harwood's global five-year strategy. We are committed to embedding environmental, social and governance policies into corporate strategies, operations and investment decisions.

We are pleased to have Ms. Christine Loh as our keynote speaker, who together with other expert speakers will discuss the latest developments and challenges in the maritime sector. We will conclude the event with a cocktail reception before the spectacular panoramic vista of the Victoria Harbour, providing an opportunity for attendees to network and collaborate.

We look forward to seeing you. Limited spaces are available, please click the link below to register. You will receive a confirmation email once your registration is confirmed.
