

A Starlink satellite is shown in space, with the Earth's horizon and clouds visible in the background. The satellite is a long, rectangular structure with a grid of solar panels and a central antenna array.

Upcoming webinar: Managing data consumption with Starlink onboard

15 February 2024, Thursday
16:00 – 16:30 HKT

As the pace of Starlink installations on vessels accelerates, a new challenge has arisen: How to manage data consumption ensuring that the "inclusive data package" lasts for a full month.

In this webinar we will demonstrate how Dualog Quota manages and controls each user's online access on a fleet-wide basis.

Agenda:

- Starlink is here, how can we make the best use of it?
- What is Dualog Quota and how does it work?
- FAQ
