

## **Invitation**

Subject: **Save the date | Strategic maritime cyber exercise in Hong Kong**

### **Join us**

The Hong Kong Shipowners Association (HKSOA) invites you to join CyberOwl's annual maritime cybersecurity conference, Cybersecure at Sea 2024. This year, the conference will focus on the high-level strategic management of a cyber incident taking place on Tuesday, 25 June, from 09.30 am to 12.30 pm, at the Artyzen Club. Followed by networking with food.

Tailored for both ship owning and ship management companies, the objective of the event is to equip you with practical tools and skills in order to guide your organisation through a cyber crisis or incident, with your company's reputation and resilience intact.

By the end of the session, you will gain confidence that the skills learned on the day will help you deliver smarter crisis response leadership, smarter in-house policies & processes, and improve your organisation's cyber crisis readiness in a way that protects its reputation and resilience.

Numbers to attend are limited so we encourage you to secure your place by clicking the link below.

Register now to secure your place: <https://bit.ly/45kyS5d>

### **Programme**

#### **09.30 – 12.30 | Full training exercise (deep dive session)**

*Most shipping organisations have never experienced a maritime cyber incident. These can be complex, rapidly changing incidents, demanding decisive actions despite incomplete or imperfect information. In this session, we will run through a simulated fleet cyber incident in detail. Attendees will gain insight into practical measures they can adopt to ready themselves and mitigate the repercussions of a maritime cyber event.*

We promise it will be an environment genuinely focused on learning, experience-sharing and building a global support network.

For more details on the conference or if you have any queries, please contact the team at [insights@cyberowl.io](mailto:insights@cyberowl.io).

We look forward to welcoming you.
