Together for sustainable shipping

## Alfa Laval Marine Solutions

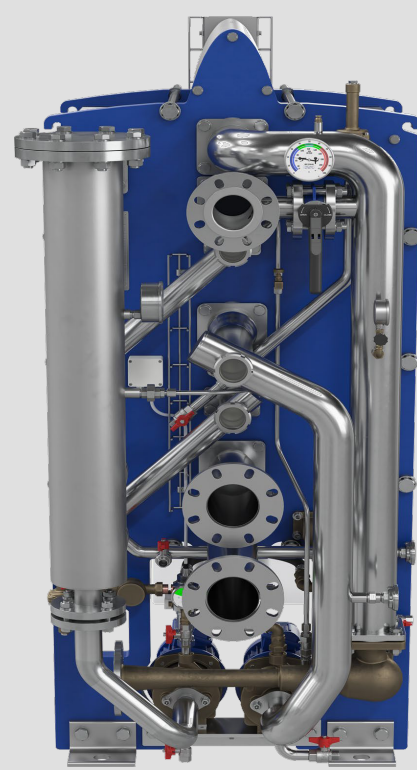

# Optimizing your existing Ship's Energy Efficiency

Aug 8, 3:00pm (GMT+8). live via Teams

### Waste heat recovery

Maximizing the existing waste heat available.

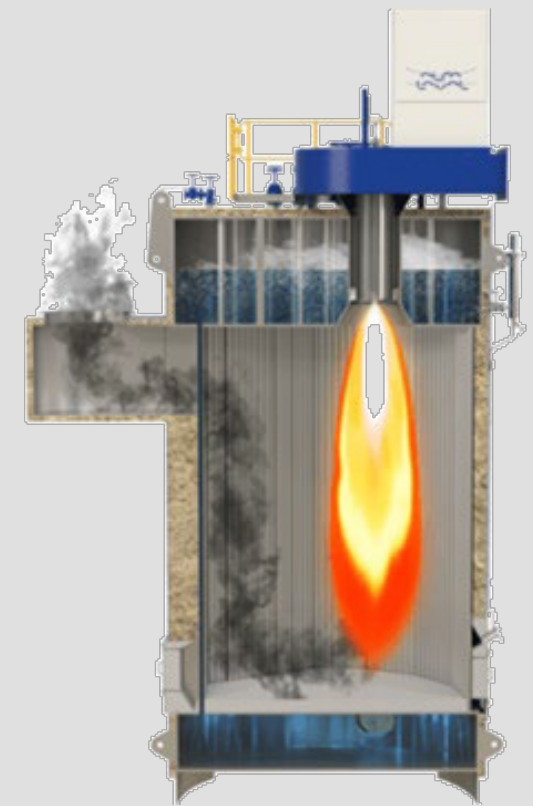

### AQUA Blue E2

50% less thermal heat and same electrical power consumption than single stage E1.

### EGC ERM

Additional scrubber energy savings.

### Low-Load Optimizer

Lowers the minimum boiler load and ensures safe and efficient boiler operation.
