For information: Submission of the FuelEU Maritime Monitoring Plans

Dear members,

Following circular (C-13750), I am pleased to share that we received a positive response from DG MOVE regarding the ECSA inquiry about the tight deadline for submitting the FuelEU Maritime Monitoring Plans.

While the Commission is unable to extend the deadline, they have assured us that they will be fully understanding and flexible with operators who submit monitoring plans (MPs) beyond the deadline. Not least because the tight deadline that companies face is a result of the delayed publication of the relevant implementing regulations, for which the responsibility entirely lies with the Commission.

The FuelEU Maritime Regulation does not include any penalties or other consequences for MPs submitted after 31 August. **Therefore, the Commission will not take any measures in the event of delayed submissions.**

On behalf of the Secretariat, I would like to once again thank the members who have been proactive on this issue, providing input and raising concerns about the tight deadline.

Please do not hesitate to contact me if you have any additional questions or comments.

Best regards,
Ulrik
