Sustainability Engagement Tracker (SET) for the Shipping Industry

Steven Jones
Seafarers Happiness
Index

The Sustainability Engagement Tracker (SET) is being developed as a simple yet effective tool to help us track progress, understand where we are, where we need to go, visualise gaps and opportunities, and improve sustainability efforts across the industry.

The tracker is a voluntary, non-profit initiative.

We will use a tailored survey methodology, repeated at defined intervals, to monitor the transition of the industry towards a sustainable model. In providing this snapshot at regular intervals, the results will not only provide the industry with a dashboard of current sustainability engagement but also seed discussion on how the industry can find means for change.

Kai

by Captains Table

Our objective

An collaborative innovation platform | Maritime data exchange (Phase 2) | New ventures and partnerships

KaiCommunity

A closed network for start-ups, whose passion and thought leadership is shaping the future of the sector.

- A trusted platform for knowledge sharing
- Collaboration hub
- A regular 1-1 mentoring call
- Access to regular networking, learning events and expert webinars
- Investment Opportunities, Brand building and visibility

Currently in the process of onboarding the Captains Table Alumni.
